CONVERSATIONS ARE THE FOUNDATION.

The true picture of an organization’s culture shows through its the conversations. Organizational culture is created and fortified through people’s conversations — in the everyday interactions within teams and between employees and customers. Improving the quality of the conversations in your organization can shift the culture, accelerate positive business outcomes, and increase profitability. Poor-quality conversations foil the best strategies, frustrate and demotivate high-performing talent, and impede organizational success.

Our Better Conversations Every Day™ suite teaches core skills that enable richer, more transparent, and more productive dialogue. These conversations expand perspectives, build capability, and nurture an environment of psychological safety and trust. Plus, this simple yet practical research-based framework provides a lifeline to leaders during stressful and challenging conversations.

After the program, participants report a shift in mindset and an expanded skillset — resulting in conversations that have positively impacted the way they meaningfully communicate at work, as well as in their personal lives. The skills taught in the program are rooted in research, designed using our unparalleled adult learning methodologies that expand mindset, plus our learnings from the 20,000+ hours we spend each year coaching clients 1:1. The program teaches participants 4 practical, essential communication skills using a memorable framework that makes it easy to hold better conversations at your organization every day.
